- The **ARTHROSCOPY** system is designed to be a Minimally Invasive System for repair and reconstruction of soft tissues of the knee and shoulder.
- The system contains Interference screws, Buttons and Sutures for securing grafts and addresses reconstruction of ACL, PCL and Rotator Cuff repair.
- RobustaFiber are Strong, durable sutures made from UHMWPE fibres that ensure strong fixation and stability. They have been rigorously tested to simulate performance in working condition.
- Specially designed instruments like the RotoGrip and Flipcutter help in achieving minimal trauma to patient and reduces operative time. The system offers easier implant deployment and enhanced control.
- Implants are available in Medical Grade Titanium conforming to ISO 5832-III, PEEK and Bioabsorbable PLLA.
