Ultra Lock II-Supracondylar Nail

- All Femoral supracondylar fractures
- Pathologic fractures.
- Failed distal femoral osteosynthesis and distal fractures.
- The 8 deg anterior bend makes easy insertion in the medullary canal.
- The nails are designed to permit the distal driving end to be counter sunk below the level of articular surface of femur.
- The first two distal holes are 15 and 30 mm from the driving end.
